

ABOUT ACCUSOURCE

Accusource Investigations is the go to agency in Florida when it comes to obtaining the best possible results in physical surveillance operations. We blend Technical (remote operated, unmanned) Surveillance with manned surveillance operations to replicate a full size surveillance team without the hefty price tag that would come along with such a team! The use of technical surveillance is not necessarily new in the investigative industry, but technology has greatly improved in recent years and Accusource Investigations embraces this technology to provide the best possible results for our clients!

THE BENEFITS:

Cost Effective

Manned surveillance can be expensive. Our Technical Surveillance can determine patterns and document activity to schedule manned surveillance in a more cost effective way or could even provide the evidence you need for your situation.

Convenient

We offer a variety of Technical Surveillance platforms to suit whatever need you may have. Some platforms can be viewed remotely and in real time and we also have cameras that can pan, tilt, and zoom remotely.

Flexibility

Our Remote Technical Surveillance platforms can be employed in a large variety of situations and areas where manned surveillance is not possible to be conducted in a discreet manner. The options are only limited by your imagination.

Higher Success

Because our Technical Surveillance cameras are in operation 24 hours per day, the odds of successfully obtaining video of your Subject are greatly increased.
